## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Group I, Species B (claim 2) in the reply filed on 14 March 2006 is acknowledged.
2. Claims 1 and 3-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 14 March 2006.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,626,858 to Lynch et al.

In the specification and figures, Lynch discloses the device as claimed by applicant. In particular, Lynch discloses an implantable shunt for treating glaucoma with longitudinal axis (represented by arm 25) an outflow portion 25 that passes through the axis and is configured to be received within Schlemm's canal (see column 8, lines 1-34) at some angle (see FIG 6C). The device comprises a plurality of openings 30 in the
